Width of the chute	1,000 mm
Height of the chute above T. R.	326 mm
Unloading chutes	4
Unloading system	pneumatic

### REMARKS

For the optimization of load volume the wagon is designed in gauge G2. Furthermore, the wagon is equipped with an additional compressed air reservoir which allows a discharge without having locomotive or other compressor on-site.

- High efficiency (tonnage/car length) = 5,4
- Less product loss due to a third adjustment position for discharge chutes
- Increased workplace safety due to ergonomic wagon equipment and handling possibility
