

Zags / GATX type 7598 (119 m³)

USAGE

The GATX multipurpose champion with a volume of 119 m³. The length over buffers was increased to 18.8 m while the outer axle distance is kept identical to the design of the current state-of-the-art Jumbo LPG wagons at 13.9 m. With such optimization measures, a reduced tare weight and an increased tank volume is achieved.
